

Slide-out Plate

System upgrades for increased efficiency and ergonomics

Atlas Copco

Minimize your effort during the barrel change

With the slide-out plate, the barrel can be effortlessly placed in the 200L material supply. The 360° turntable allows easy and optimal rotation and placement of the barrel, facilitating barcode scanning and material documentation. Only one operator is needed to increase barrel change efficiency and reduce costs.

What we provide

- Effortless positioning thanks to sliding turntable
- Easy 360° rotation of the barrel thanks to ball bearings underneath the turntable

Values

- Adhesive label displayed in front for quick identification and bar code scanning
- Only one operator needed

The challenge

1 2 3 4

Especially the 200L barrels for Gapfiller materials are extremely heavy, which makes the barrel change very demanding.

Is the barrel already placed with the label in the back, turning it is not possible for one person.

The solution

1 2 3 4

Update your 200L material supply with the slide-out plate to place the barrel effortlessly. Fits legacy and ENSO 7000 barrel pumps.

The values

1 2 3 4

- Only one operator is needed
- The barrel change is made much simpler and more ergonomic
- The label can easily be placed in front

Best if combined with

1 2 3 4

Barrel change trolley

- The semi-electric trolley is the perfect match to the slide-out plate to make barrel changes even more simple
- The trolley lets you transport the barrel by grabbing it with an automated clamp from the upper edge
- The barrel will easily be placed on the turntable of the slide-out plate from above

We are the service partner for all Atlas Copco assembly technologies:

Tightening

Self-pierce
riveting

Dispensing

Flow-drill
fastening
